Special Offer for Students and Universities

Dear Poseidon User,

First of all, we would like to thank you for the overwhelming response to our latest newsletter and our introductory offer. It was the most successful month in our history and we received lots of compliments for the new version of Poseidon for UML. Nevertheless, there were some small bugs to fix so we have posted version 2.0.4, available for download today. See below.

Respecting our strong university background we support universities and students with a special offer for our high-end version, the Professional Edition.

- » [Opp. for Univ. Networks](#) ☐
- » [Special Offer for Students](#) ☐
- » [Poseidon for UML 2.0.4](#) ☐
- » [Mailinglist](#) ☐

New Opportunity for University Networks!

Due to a new key mechanism, we are now able to provide licenses for a **range of IP numbers**. This enables universities to buy Poseidon licenses for their PC pools including up to 256 IP addresses (e. g. a Class C-network). We offer the **Professional Edition University Network** for only **€/US\$ 1990,-**. To take advantage of this offer, please [register](#) for our university program. You will be contacted by us for the details.

Also note: **Students** have the chance to buy a Professional Edition for their homework at a discount, too.

Special Offer for Students: Professional Edition for €/US\$ 69,-!

For enrolled students we offer our **Professional Edition** for only **€/US\$ 69,-**. The Professional Edition includes roundtrip engineering for Java, gives full access to Poseidon's code generation technology and provides forward engineering for CORBA IDL, C#, PHP and VB.net.

The license is neither limited in terms of time nor functionality and you will fully benefit from reduced prices on version upgrades in the future. To make use of this exceptional offer you have to buy the Professional Edition Students Special in our [webshop](#) and send us a copy of your students ID (matriculation certificate) via fax to +49 40 24425331 or via e-mail to students@gentleware.com (use PNG- or JPG-attachment).

Download Poseidon for UML 2.0.4

As mentioned above, we fixed some smaller bugs in our release version. The latest version 2.0.4 contains the following corrections:

- . improved conversion of old projects
- . corrected "same xmi.id used twice" errors when loading a project
- . improved grid snap
- . fixed problems with undo edo with ordered elements like parameters and arguments

Furthermore we added **PHP code generation** to our Professional Edition.
