### Enterprise Edition - Ready for Take-Off

---

#### Dear Poseidon User,

Poseidon for UML has received a Reader's Choice Award by the Java Magazine. What does that tell you? Well, it says that we have a nice little UML tool that is just about as cool as the others. But here is the real news: The Enterprise Edition with the slickest support for teamwork in modeling is now released.

### Enterprise Edition: UML in Teams

---

The Enterprise Edition enables collaboration on models. The whole team of developers can work on the same project at the same time. The model is synchronized in realtime. It also offers multi-user interaction, version control, locking for any level of granularity and much more.

Here is what one of our test users says about this unique offering:

*"We were already familiar with Poseidon because we use the Professional Edition. Having a team of six developers put a bottleneck on the project because design had to be done in a group. Gentleware came to the rescue with the Enterprise Edition. Now the developers can design our system in parallel from their workstations while still working on a single copy of a model. We save time because changes to the model can be made on the fly without worrying about merging those changes later."*

Michael Brown , Director of Technology  
Source One Network Solutions Madison, WI

### Test-Drive

---

Try out the Enterprise Edition against your project needs by test- driving it with complete feature set for a period of 30 days. Totally free of charge; give it a spin:

## Live Demo

---

If you want to see the Enterprise Edition in action, come and see us at the world's largest IT convention, the CeBIT Fair in Hanover, Germany. From March 18 to 24 we are exhibiting in Hall 3, booth E66.

## Live Introduction Online

---

Time is the most valuable asset for development; thus, we will be hosting an online event to get you introduced quickly. In technically oriented one hour sessions, our senior development engineers will provide you with a comprehensive overview of teamwork issues and best practices in using the Enterprise Edition for highly collaborative UML modeling environments. Choose from one of the scheduled events on April 7, April 15 and May 4:

## Floating License Mechanism

---

We are pleased to introduce a frequently requested license feature: the Enterprise Edition has a floating license mechanism. A number of concurrent users are licensed to execute Poseidon for UML on any client connected to the server. This enables a group of users to share the Enterprise Edition based on their project needs and schedules. Take a look at our prices, and you will see that we are dedicated to maintaining our outstanding feature-to-price ratio.

## New Upgrade Subscription

---

Our new upgrade service is the answer to an often heard request by our user community. It ensures investment security and enables immediate access to the latest features and bug fixes. It begins today with an upgrade subscription service for the Enterprise Edition, and will be successively expanded to all other editions, even for existing licences. If you want to benefit from this convenient service, have a look at our upgrade page:

## Seminars

---

Our new seminar dates have just been released. Trainings now include modeling in a team! Take advantage of a seminar with one of our UML trainers and register today!

» [Seminars](#) ➤

I wish you all an exciting time while modeling with the Enterprise Edition and hope to meet you at CeBIT show in Hanover.

Best regards,

Marko Boger  
CEO
