Poseidon for UML 3.2 Released

Dear Poseidon User,

The office has been full of excitement as we prepare to launch the newest version of Poseidon for UML. The UML 2 standard has given us the opportunity to focus creatively as a team and arrive at a superb tool with a uniquely user-friendly interface. We've enjoyed the process, and we know you'll be as thrilled with the result as we are.

Viewlets expanded

What better way to get acquainted with Poseidon for UML than with your own guided tour. The viewlets in Flash format take you through some of the most innovative aspects of Poseidon, and even Poseidon experts may find a trick or two to enhance their UML experience.

New viewlets cover Word 2003 documentation generation and UML 2.0 sequence diagrams.

Poseidon for UML - 3.2 Official Release

We are proud to announce that the greatly anticipated version 3.2 has been released! We could tell you all about the new sequence diagrams and how cleverly they can be used to enhance your models, or we could go into great detail about the advantages of automatic Word 2003 documentation generation at the push of a button. But seeing is believing, and we know you just want to get started testing these features for yourself - and we're eager to demonstrate.

Embedded Enterprise Edition

UML 2 advances are now available for real-time systems with the Embedded Enterprise Edition (EmbEE) of Poseidon for UML. Designed with the specific needs of embedded systems in mind, Poseidon EmbEE allows you to use UML and object-oriented development techniques to produce systems with very low overhead.
