Poseidon for UML 4.0 Released

Dear Poseidon User,

The holiday season is upon us, and we at Gentleware have an additional reason to celebrate - we're ending yet another successful year with a new major release of the outstandingly popular tool 'Poseidon for UML'. On New Year's Eve we'll sing Auld Lang Syne to honor times gone by, but rather than continuing to look back and rest on our laurels, we've already begun work on even more features to bring you the absolute best UML 2 tool possible.

Read on to find out more...

- » **Poseidon 4.0** 
- » **New Activity Diagrams** 
- » **New Viewlets** 
- » **Discounts on Updates** 
- » **Screenshots** 
- » **Job Announcement** 

Poseidon for UML - 4.0 Official Release

The new major release incorporates even more of the UML 2 specification in an intelligent way. Unlike many tools on the market, Poseidon implements not only the UML 2 rendering but also the logic behind the drawing, resulting in a more meaningful model. Elements can only appear in legal representations, which simplifies the interface and ensures model correctness by presenting only the relevant options. Seeing is believing - give Poseidon for UML a try with a free evaluation.

UML 2.0 Activity Diagrams

Activity Diagrams are an essential part of the modeling process, capturing the behavior of the system by mapping the sequence and decision paths of activities. Poseidon for UML version 4.0 implements the richer notation of UML 2 Activity diagrams; for example, a differentiation between the flow of control and the flow of objects and data. Also included are items such as pins and signal and event actions.

New Viewlets

What better way to get acquainted with Poseidon for UML than with your own guided tour. The viewlets in Flash format take you through some of the most innovative aspects of Poseidon, and even Poseidon experts may find a trick or two to enhance their UML experience.
