Poseidon for UML 4.1 Released

Dear Poseidon User,

Judging by the international weather reports, the arrival of spring apparently isn't as certain as it used to be. But you can take a little comfort knowing that our releases are reliable! We've worked hard to bring you version 4.1 of Poseidon - our best yet.

Read on to find out more...

Poseidon for UML - 4.1 Official Release

We are proud to announce that version 4.1 has been released! Among the highlights of this new release, you'll find Activity diagrams with full UML 2.0 compliancy, Ecore export for modeling metamodels in the Eclipse Modeling Framework, customized footers in HTML-generated UMLdoc, and much more. Take a look for yourself with a free 30-day evaluation.

UML 2.0 Activity Diagrams

Activity Diagrams are an essential part of the modeling process, capturing the behavior of the system by mapping the sequence and decision paths of activities. Poseidon for UML version 4.1 boasts fully compliant UML 2.0 Activity Diagrams including:

- Activity partitions
- Structured activity nodes
- Expansion regions
- Conditional nodes
- Interruptable regions
