Poseidon for UML 4.2 Released

Dear Poseidon User,

It's an exciting time here at Gentleware; we've been working on many new features and it's finally time to unveil them to you, our loyal user community. We're confident that this is our best release yet, and certain that you'll agree.

Poseidon for UML - 4.2 Official Release

We are proud to present version 4.2 of Poseidon for UML! With a UML 2.0 Component diagram as well as handling and stability improvements, Poseidon is better than it has ever been. Download a copy and try the new features yourself:

- Simple double-click can change the diagram display from standard view to full-window mode and back again.
- New packages can be created within a diagram and elements added to that package with a single drag maneuver.
- Drag and drop within a diagram has been enhanced to show a preview of package reassignment and to automatically resize those packages.
- The display of any element is much more configurable through checkboxes.
- Improved documentation generation makes the model easier to share with other stakeholders.

New Viewlets

See some of Poseidon for UML's exciting new features in our collection of new viewlets. Provided with or without audio narration, these video clips provide a glimpse into the new release and may just teach you a shortcut or two to speed up your work.

Object Orientation and UML Course - Gratis!

Gentleware has teamed with UK-based Synergy Learning to produce a multimedia course. Topics are presented in a variety of formats so you can choose the best combination for your learning style. Listen to the podcast on your way to work, then watch a few videos or give the self-assessment tasks a try. Visual learners may prefer to read the PDFs first. It's completely up to you.

The introductory course is free of charge for our user community. More advanced courses are planned, so stay tuned.
