Apollo for Eclipse 1.0 Released

Dear Poseidon User,

It's a new age here at Gentleware, and this is the very last newsletter that will be addressed only to Poseidon users, lest we leave out our dear new Apollo users. That's right, the wait is over... Apollo for Eclipse, the newest modeling tool from Gentleware, has been launched!

Read on to find out more...

Apollo for Eclipse 1.0 - Official Release

Apollo for Eclipse is a modeling tool for programmers and developers who want to flexibly combine the advantages of visual modeling using UML with Java programming. Fully synchronized roundtrip engineering employs the latest releases of UML 2.1 and Java 5 to provide an instant visualization of any existing Java code through UML class diagrams, and likewise propagate changes to the UML model throughout the code.

The tool fully integrates into the Eclipse environment, which makes it easy for developers to view code as models, and vice versa.

Features include:

- Forward, reverse, and roundtrip engineering
- Support for Java 5
- Support for UML 2.1
- Superior class diagram handling
- Available as a stand-alone Rich Client Platform or as an extension to Eclipse

New Licensing Structure

Apollo for Eclipse licenses are available to rent, much like web services. You can rent a license for a single period or on a continuing subscription basis. This licensing model allows professional organizations to deploy Apollo for Eclipse as they need to, and for a lower cost.

An unlicensed version of Apollo for Eclipse is also available, just download and start working. Export options are disabled in the unlicensed version.

This licensing structure will apply to the Community Edition of Poseidon for UML, beginning with the release of version 5.

Gentleware Joins Eclipse Foundation

Gentleware has selected the Eclipse IDE for both in-house development and as a platform for Apollo for Eclipse and future products. To support this effort, Gentleware has joined the Eclipse Foundation as an Add-In provider.

Poseidon for UML Version 5 - Coming Soon

The addition of Apollo for Eclipse to the offerings of Gentleware doesn't mean the end of Poseidon for UML. A new major release of Poseidon for UML is coming before the end of the year, so keep watching for upcoming announcements.

Best regards,

Marko Boger
CEO
