### Apollo for Eclipse 1.1 Released

---

#### Dear Gentleware Customer,

Some major changes have been afoot here at Gentleware: a new release of Apollo for Eclipse, a new partnership with b+m Informatik AG, and a lot of new friends from the OOP Conference in Munich.

Read on to find out more...

### Apollo for Eclipse version 1.1 - Official Release

---

We are proud to present the newest version of our newest modeling tool, Apollo for Eclipse. Specifically designed for software developers using the Eclipse environment, version 1.1 offers more speed, stability, and usability.

Enhanced navigability, improved package handling, and new rapid buttons are just a few augmentations waiting for you.

Our favorite new feature: the inline diagram editor puts the Java code editor directly into the diagram. A double-click on a class, attribute, or operation opens the editor for immediate access, meaning faster development.

Try the the new features for yourself and see what a difference they make to your modeling.

### Model-Driven Software Development Market Expansion

---

You may have noticed the new look to our website, including the new addition of "a member of the b+m group". In an exciting move, we've teamed up with b+m in order to expand further into the project market for model-driven software development, with a particular focus on domain-specific languages (DSLs). You may already know b+m as the initiator of the popular openArchitectureWare generator framework; they are a leading software solution provider with a strong model-driven approach. Combining their experience with our particular knowledge of Eclipse-based modeling tools and domain specific languages (DSLs) creates a wealth of synergies.

Looking to speed up your project with a DSL and generator? Drop us a line.

## Gentleware Sponsors the OOP 2007

Gentleware is proud to have been a Bronze Sponsor of the OOP Conference, held in January 2007 in Munich, Germany. The conference presented a great opportunity to showcase the new version of Apollo for Eclipse, which was met with resounding approval and enthusiasm.
